

CCG PLANT COMPACT CEMENT GRINDING PLANT FOR THE LOCAL MARKET

The CCG is a small-scale grinding plant designed to produce different types of cement.

- Shortest delivery time
- Fastest market entry
- Easy to assemble
- Relocatable

schenck process

Cut Energy Costs through Alternative Fuels.

Reducing energy costs is a top priority for every company. The Schenck process system for alternative fuels helps you save energy, but also benefits your entire plant with its great range of equipment & services: rotary kilns, grate coolers & more. The Schenck process system for alternative fuels helps you save energy & reduce your CO2 footprint.

500,000,000 tons of clinker every year
500 t/h clinker mill Distribution Systems (KIDS) have been installed worldwide. They handle more than 500 million tons of clinker every year.

KIDS generate even clinker beds of uniform resistance against the passage of air. This is good for you. We'll let you know why!

FORGE YOUR COMPLETE CEMENT CHAIN WITHOUT COMPROMISE

What if it were possible to forge your complete process chain with nothing but ISO-class technologies, while still giving all responsibility into one set of hands?

With HAVER & BOECKER you can now do exactly that!

With HAVER & BOECKER's HBI™ process technology, ISO-HAMBIURG storage technology, HAVER with the legendary ROTOPACKER® and NETWEC® polishing and loading technology we combine only the best brands in the cement industry to design your complete process chain without making any compromises.

For more information call +49 2522 30 348 or send an email to info@hbv-haver-boecker.com www.haver-boecker.com
